SUMMARY

MERN Stack Developer with 2+ years of hands-on experience building scalable, high-performance web apps using React, Node.js, Express, and MongoDB. Skilled in state management with Redux-Saga and UI optimization using Material UI and Bootstrap. Passionate about clean code, agile development, and delivering impactful user experiences.

EXPERIENCE

MERN Stack Developer

RowthTech

07/2023 - Present Chandigarh

Independently led end-to-end project development by gathering requirements directly from the client, implementing features, and resolving issues to ensure timely and efficient delivery.

- Successfully optimized pages for mobile using responsive frameworks like Bootstrap, MUI.
- Developed and optimized frontend components using **React** and **Redux-Saga**.
- Consistently met tight deadlines while juggling multiple projects, ensuring smooth operations and minimal disruption.
- Collaborated in Agile teams, participated in code reviews, and ensured clean, maintainable code.

MERN Stack Trainee

RowthTech

04/2023 - 07/2023 Chandigarh

Focused on getting experience of working in live projects, understanding and fulfilling client demands.

- Learnt State Management libraries like **Redux-Saga**.
- Worked Under seniors and completed all the tasks related to front-end and back-end efficiently.
- Leveraged JavaScript knowledge in developing interactive UI components for seamless user experience.

PROJECTS

SPIFF

An ecommerce app that had React JS, Redux Saga for state management and Node JS for backend. It was used to sell products.

Accounts Pro

A B2B (Business-to-Business) and B2C (Business-to-Consumer) SaaS (Software as a Service) platform, which was used by clients and their accountants.

Head Office

B2B eCommerce & Supplier Management category platform, in which products were created and assigned export through which they were sent to master list (to suppliers who sold them based on the rates of these products).
